Paigalda vaheseina kandurid, vastavalt joonisel olevatele mõõtudele, puurides (5,0 mm puuriga) läbi kanduris olevate avade ja kinnita naeltüüblitega 5x30 mm.

Alusta postide paigaldust vasakult paremale, jälgides värava hingesõrmede õiget paigalduse suunda.

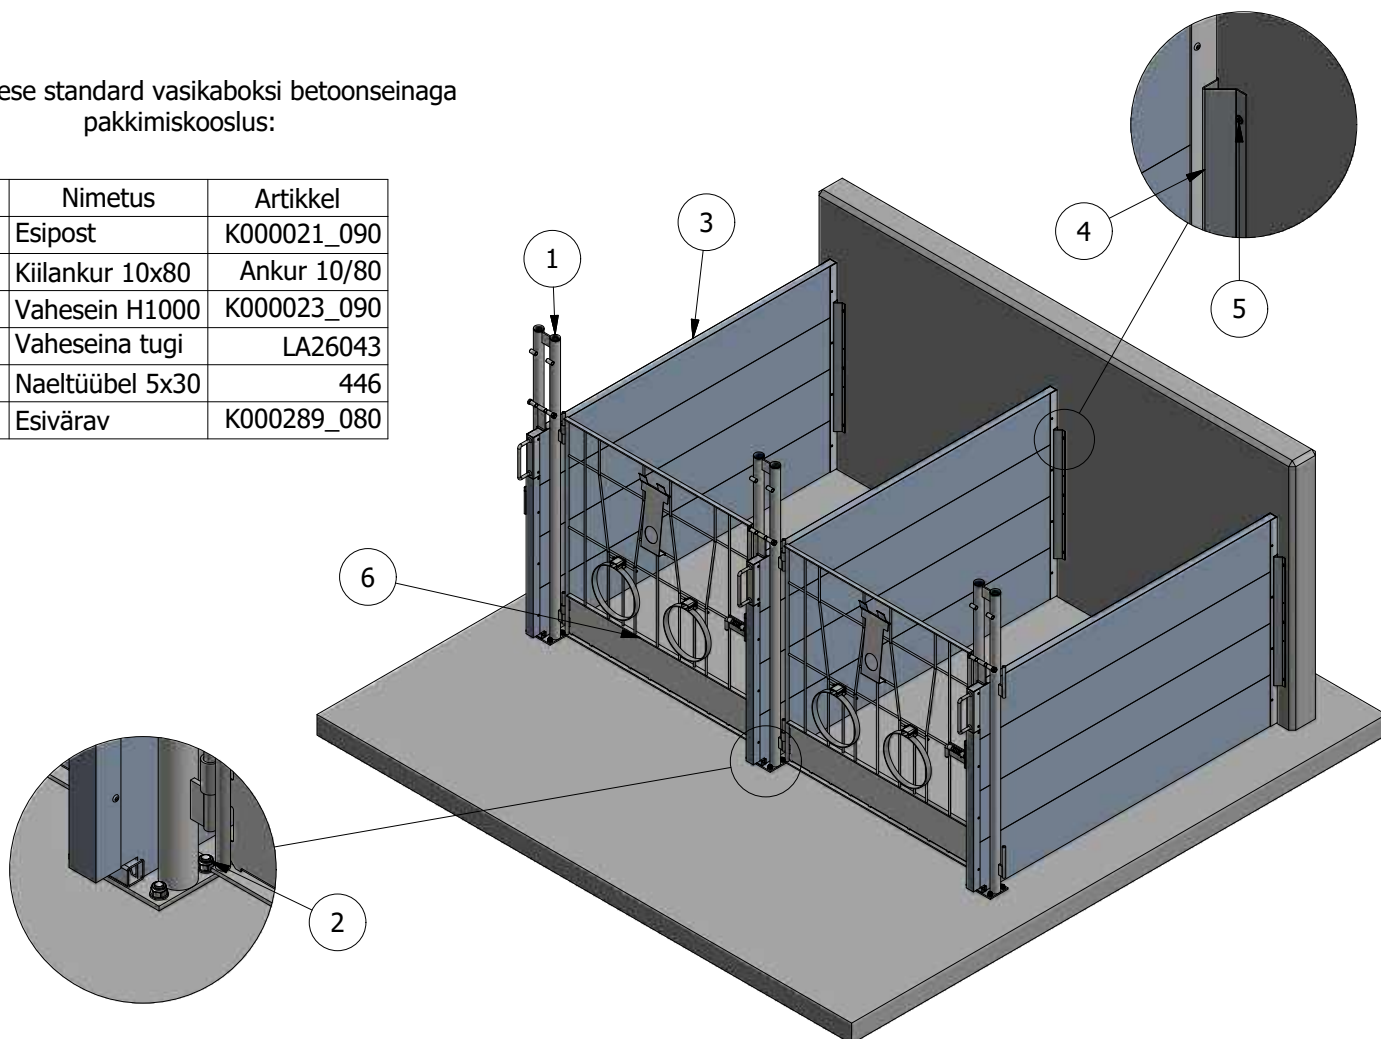

Paigalda esipost samuti kiilankrutega 10x80, jälgides posti tsentri joondumist vaheseinakanduri tsentriga.

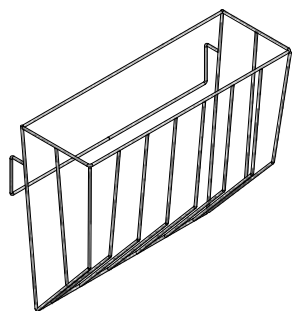

Paigalda väravad ja vaheseinad. Jälgi vaheseina stopperi (A) õiget paigutust, mis takistab vaheseina ülestõstmist.

Kahese standard vasikaboksi betoonseinaga pakkimiskooslus:
